WATCHES, CLOCKS, OPTICAL GOODS,
Etc.

Watch and Clock Repairing a Specialty.

223 W. Main St.,

Opposite Park.

Battle Creek, Mich., July 16, 1889

U. S. Mint
Philadelphia, Pa.
Gentlemen; -

I have quite a lot of gold I wish to dispose of. I wish to inquire how small an amount you would bother with. I have been having poor luck buying gold, usually having to discount it about 4K in order to save myself selling it to individual assayers. If you can give me any method of testing it so I can allow for it what the grade really is, I will consider it a great favor.

If I test gold according to my testing needles and send it to Chicago I get about 4K less than I tested it.

Please give me full information if you bother with us Retzgil Jewelers any. I have a lot of roll plate

stuff I wish to dispose of.
If you do anything with
that

An early reply will
be of great value.

Yours respectfully,

H. J. Levy.

N. B.; - Do you use any more
than one kind of acid?

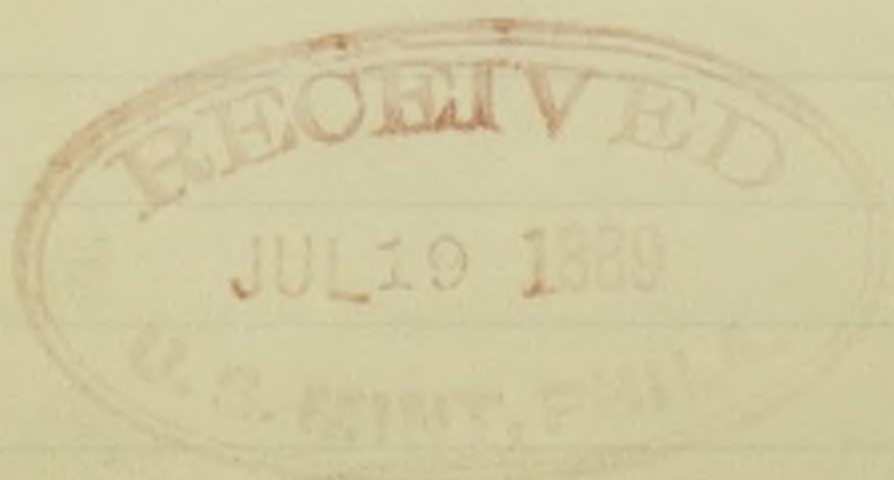

I have nitric acid and I
can see no change from
14K up, as far as a change
of color is concerned.

Battle Creek, Mich.

July 16. 1889.

H. J. Levy.

Inquire how to
make a deposit of
Gold.

[Abstract:] Inquires how to make a deposit of gold.

Henry J. Sevy,
Dealer in Watches, Clocks, Optical Goods, etc.
